# APPROVED ROLEC <sup>EV</sup> INSTALLERS

In recent years the electric vehicle industry has taken huge steps forward, which has included significant advancements in battery technology.

With a new generation of PHEVs now offering a greater electric driving range than that of the early full electric vehicles, the original phobia of “range anxiety” is now becoming a thing of the past. When you combine the advancements in battery technology with the continued deployment and expansion of the UK’s charging infrastructure, the tipping point of EVs becoming mainstream is very definitely on the horizon and we can ensure remain ahead of the curve.

# HALLS ELECTRICS

We continue to have the pleasure of installing and maintaining electrical solutions to a growing portfolio of businesses by offering;

- ✓ Fully qualified EV charging installation
- ✓ Approved Roolec EV charging installers
- ✓ Approved OLEV workplace government grant EV charging installers
- ✓ Free on-site assessments
- ✓ Bespoke colour, branding and logo options suited to your company
